ABN: 84 245 695 380

**PRESIDENT:** Trish Peterson 0412 568 985 [trishpet@hotmail.com](mailto:trishpet@hotmail.com)

**SECRETARY:** Bruce Potter 0407 452 392 [bjfpotter@gmail.com](mailto:bjfpotter@gmail.com)

**TREASURER:** Ela Kielich 0434 843 037 [elak@internode.on.net](mailto:elak@internode.on.net)

**EDITOR:** Bill Dobson 0409 545 955 [bdobson@optusnet.com.au](mailto:bdobson@optusnet.com.au)

**COMMITTEE:** Judith Barry (Librarian), Lorraine Dobson, Jane & Peter D'Olier, Cary Polis, Ian Tanner, Bryan Spurrs

**Web Administrator:** Jane D'Olier **Website:** [www.anoswarringah.org](http://www.anoswarringah.org) **Facebook:** [ANOS - The Warringah Group Inc](https://www.facebook.com/ANOS-The-Warringah-Group-Inc)

**CORRESPONDENCE:** PO Box 421, Forestville NSW 2087

**Monthly Meetings:** 3rd Tuesday at 8:00 pm - Senior Citizens Hall, Starkey Street, Forestville

## October 2020

*Dockrillia striolata* 'Ruffles' David Hemmings

Joan Cook Memorial Trophy  
Best *Dendrobium kingianum* - Members Choice  
*Dendrobium kingianum* 'Gotcha' x 'Joyus' David Hemmings

*Dockrillia schoenina* 'Dad's Tree' David Hemmings

**Next meeting**  
**Tuesday 20th October**  
**Members Sarcochilus Show**

## Dear Members

We will be having our **Members' Sarc. Show** at the October meeting. This is usually a big event on our calendar, and we are hoping that despite the pandemic, your Sarcs are still growing and flowering! We hope to see many of them on the bench again this year.

There will again be a members' judging of the best *Sarcochilus* and the winner will receive the Iris Pendle Memorial Trophy.

Our **Sales Bench** will be up and running again at our October meeting.

- Please mark sales items with your name and the sale price.
- It would be helpful if you could provide a list of the items you have for sale.

To ensure Covid-19 precautions are followed, members will be issued with a number on arrival which will be drawn randomly and two members at a time will be permitted to approach the sales table and make purchases if they wish.

The kitchen will still be closed, so there will be no supper, but we will be having a Raffle and Lucky Door Prize. Please bring the correct change for your raffle tickets so that George doesn't have to handle too much cash.

Covid-19 Precautions are again listed below!

Please remember to sign in and to use hand sanitiser on arrival and departure.

### **COVID-19 PRECAUTIONS**

There are a number of precautions which must be observed by all attendees at our meetings:

**DO NOT COME IF YOU ARE UNWELL or have had recent contact with anyone who has symptoms of cold or flu or from a recognised 'hotspot'.**

- The kitchen is closed – there will be no supper
- Members to use hand sanitiser on arrival/leaving
- George to record all attendees – contact details to be checked including phone numbers – Please sign in!
- Social distancing to be observed at all times
- Please avoid congregating at check-in, benching tables etc.
- Please do not touch plants belonging to other members
- Tables/chairs and other touch points to be wiped down before and after the meeting
- Chairs to be placed at a 'social distance' – 1 person/4sq.metres

We would like to see you at our October meeting however we are aware of the risks of Covid-19 and understand that you may not wish to attend.

Be assured that we will be taking all appropriate precautions to keep everyone safe and ask for your co-operation in managing the situation.

Hand sanitiser, antiseptic wipes, Glen 20, and gloves will be available for use by members.

Trish Peterson

## MONTHLY MEETING OF ANOS WARRINGAH GROUP

### 15 SEPTEMBER 2020

Minutes of the monthly meeting held at the Senior Citizens Hall, Starkey Street, Forestville on Tuesday, 15 September 2020.

The meeting was opened at 8.10pm by Trish who reminded all present of the need to adhere to the Covid protocols.

**Guest Speaker:** No guest speaker. The meeting was the Members' Spring Show including the annual competition for the best kingianum and award of the Joan Cooke Memorial trophy.

**Committee Members Present:** Trish Peterson (President), Bruce Potter (Secretary), Ela Kielich (Treasurer), Jane & Peter D'Olier, Judith Barry, Cary Polis, Ian Tanner

**Visitors:** Trish extended a warm welcome to visitor Roslyn Mathews

**Apologies:** George Hardy, Bill & Lorraine Dobson, Bryan Spurrs, John McAuley, Bill Westwood, Steve Dunstan, Barry Moore, Reiner & Judy Schneidereit, Peter Dunstan, Jan & Geoff Duggan.

The minutes of the previous meeting held on 17 August 2020 as published in the Bulletin were accepted as a true record on the motion of Bruce seconded by Ted Shaw.

Matters arising: Photo benching. While this is continuing, photos included in the Bulletin will be limited to 20 per membership to assist with its production and distribution. Other photos submitted may be placed on the group's website and Facebook page.

#### Correspondence:

- Notice from Northern Beaches Council re hall rental for August. \$85.73 paid.
- Email from David Jones, ANOS, re subscription renewal for 20/21. Already paid.
- Bendigo Bank term deposit advice re maturity on 17 Sept. \$8482.43. To be reinvested for same term i.e. 5 months.
- Australian Orchid Foundation requesting email address for corresponding with the Group.

Correspondence moved for acceptance by Bruce seconded by Cary.

#### General Business:

- Popular vote: Trish encouraged members to record their popular vote for the best plant at tonight's meeting.
- ANOS Sydney Group will be holding a sale this coming Saturday 19 September, from 10am to midday at 305 North Rocks Rd, North Rocks.
- Sales table. The sales table will recommence at our October meeting with access to the table at any one time limited. This will be done by allocating numbers to those attending the meeting then randomly drawing numbers. Members will be encouraged to make their purchases quickly.
- Members' Sarc. Show. The October meeting will be our annual Members' Sarcophilus Show. The Show Schedule to be sent to members and listed on our website.

*Dockrillia striolata* var. *chrysantha* L & B Dobson

**Patron Mick Korzenowski: In My Bushhouse.** The subject of Mick's talk was *Den. suffusum*, a natural hybrid between *Den. kingianum* and *Den. gracilicaule*. A relatively recently found natural hybrid, there were 3 known clones in 1964. Mick illustrated his talk with a selection of the parent plants showing a wide variation in form and colour along with several examples of *Den. suffusum* again demonstrating the differing colour and form. Trish thanked Mick for another of his interesting and informative talks.

**Judges Report:** While the number of plants benched were down on what might normally be expected for this time of the year, Erik Lielkajis commented that there were some high quality plants on show.

#### Plant of the Evening:

*Dockrillia striolata* 'Ruffles' -David Hemmings

Other Plants of Interest:

*Sarcophilus falcatus* – Trish Peterson

*Dendrobium* Our Native – Irene & Ian Chalmers

*Bulbophyllum bracteatum* - David Hemmings

*Dendrobium* Sundaani Special - David Hemmings

*Dendrobium* Gowan's Tangelo - Ela Kielich

*Bulbophyllum microsphaerum* sect. *minutissimum* - Irene & Ian Chalmers

*Dendrobium* Australian Sheenamere - David Hemmings

#### After the break:

Members examined plants submitted for consideration as best *Den. kingianum* and voted by a show of hands on their choice for the award of the Joan Cook Memorial Trophy. The winner was David Hemmings with *Dendrobium kingianum* 'Gotcha' x 'Joyous'.

**Lucky Door Prizes:** Chris Nidagal and Roslyn Mathews.

**Raffle Prizes:** Bruce Potter, Ian Chalmers (2), Ted Shaw, Chris Nidagal, Peter D'Olier.

The Meeting closed at 9.40 pm. Trish thanked all for their attendance, wished all a safe journey home and hoped to see all at next month's meeting.

## Schedule

### Members' *Sarcochilus* Show 2020

The classes for Sarcanthinae benching in the Members' Sarc. Show 2020 will be as follows:

There will be two main prizes:

**Overall *Sarcochilus* point-scorer of the evening** Based on the Judges' assessment. Results to be carried over and the most successful exhibitor to be announced at the Christmas Party.

#### **Best *Sarcochilus* of the evening**

To be assessed by members as a group.

The grower of the winning *Sarcochilus* to be awarded the Iris Pendle Memorial Trophy.

**The classes will be:**

#### **Species:**

1. *Sarcochilus hartmannii*
2. *Sarcochilus fitzgeraldii*
3. Other Sarcanthinae species #1
- 3A. Other Sarcanthinae species #2 (e.g. *Plectorrhiza* etc.)
4. Sarcanthinae seedling first flowering

#### **Hybrids:**

5. Primary *Sarcochilus* hybrid with *S. hartmannii* and/or *S. fitzgeraldii* parentage
6. Sarcanthinae hybrids predominantly WHITE
7. Sarcanthinae hybrids predominantly PINK/RED
8. Sarcanthinae hybrids predominantly OTHER COLOURS / YELLOWS/BROWNS
9. Sarcanthinae hybrids – first flowering
10. SPECIMEN size SPECIES or HYBRID
11. Novelty Sarcanthinae (e.g. Richard Jost, Kilgra, etc.)

*Sarcochilus falcatus* Trish Peterson

*Plectorrhiza tridentata* Trish Peterson

*Sarcochilus falcatus* Trish Peterson

## In My Bushhouse

Ah September - October, Dockrillias have now come into their own and are making an impressive display in my bushhouse, with *Dockrillia calamiformis*, *fairfaxii*, *linguiformis*, *nugentii*, *pugioniformis*, *racemosa*, *schoenina*, *striolata*. Of these *Dockrillia calamiformis*, *pugioniformis*, *schoenina*, *striolata* are the star performers with mass flowerings of each, and as I love specimen plants these have not disappointed.

Other plants in flower are *Bulbophyllum wadsworthii*, *Dendrobium falcorostrum* and *Dendrobium jonesii*, *Sarcochilus falcatus*, *Plectorrhiza tridentata* with its' beautiful perfume drifting through the bushhouse.

The next round of flowering will be the late *Sarcochilus falcatus*, *Sarcochilus niveus* and spikes coming on *Sarcochilus olivaceous*. *Sarcochilus ceciliae* and *setosus* are pushing up spikes but will be late in October or November.

We also have *Cymbidium canaliculatum* coming into flower which is exciting one since 2009 I have never seen in flower and this year it has 10 spikes see next Bulletin for more on this.

My *Sarcochilus* hybrids look a treat, as I undertook a complete repot earlier in the year added some slow release and blood and bone to each the leaves all look shiny and new and best of all every plant has many, many spikes. So the next 6 weeks will be good waiting for some of these to come out.

At the moment in my bushhouse, when I can get in there, I am cutting off all the old *Den. speciosum* spikes as they have completed by now even my *Den speciosum* var. *hillii* which was the last to fully open. It takes time when you have a lot as each plant has 1 set of scissors that are sterilized and then cleaned and re-sterilized prior to re-use. I use a 20 liter bucket that has a number of 80mm pots in the bottom for the scissors to stand in then a saturated solution of Trycleanium where they are left to re-sterilize for at least ½ hr. while I have a break and start again. Note: Trycleanium® Contains 100% alkaline salts, does not include caustic and is non-corrosive. However, do not let it come in contact with brass or alloy, diecast or aluminium.

This is prime time the next 6 week to pot on your plants or break them up, as we enter spring proper. Watch out for aphids and keep up the fertilizing weekly to get plants established and new growth growing strongly. For bugs use EcoOil and Neem oil for a good coverage.

The winds will dry your plants out so pick up a few and see how they weigh. Remember sun, wind and rain are your friends but get them right and your plants will take off.

Good Growing

## In My Bushhouse

Hi everyone, good to chat to you again. This is about waterwell pots *Dendrobium falcorostrum* and me.

About two years ago I attended a Seminar during the supper break at the Orchid Species Society conducted by Professors Nidagal, Polis and Cantor and the subject was Waterwell Pots. I was admiring Chris's plant of *Den. hancockii*, The plant was amazing. Great growth and heaps of flowers. Chris informed me that it was growing in a waterwell pot and he was very pleased with the growth and flowering. He has been using the waterwell pots for sometime and had great results on some orchids. Cary and Guy were having great results growing *Coelogene* in waterwell pots also.

This technique is totally different to what we have been doing, mainly watering and drying out not wicking. I know that these Orchids are not Australian Natives, but some of them grow in similar conditions.

For years I have had trouble growing *Den. falcorostrum* in my conditions on the Coast. I had killed more than I wish to admit Nothing to loose, I had one struggling plant to give waterwell pots a go.

WELL what a pleasant surprise. Two years on and what a plant, great growth and great flowering. Have a look at the Pics.

Now, please don't go overboard and believe that this is the answer to your orchid growing. Over the years many Magic mixes and techniques have appeared. Not all of them work for everyone. Do your research, it is a part of growing orchids. Take time to find out where and how our native species grow and what they require. It is a rewarding exercise.

Not many of your orchids will like waterwell pots. *Den. falcorostrum* is a cool highland species which gets mist moisture every evening. On the coast this is hard to replicate. The waterwell pots could be the answer to those cool highland species. Only time will tell if this is a longterm

fix. I will cautiously try other similar growing species. I have a mixed collection and some orchids don't like it wet and some don't like it dry, a real juggling act.

Once again, what works for me in my conditions, may not work for you in your conditions. DO YOUR HOMEWORK You will enjoy your orchid even more.

Until next month Take Care and Keep Safe.

Regards Mick.

*Dendrobium falcorostrum* Mick Korzenowski

*Dendrobium falcorostrum* L & B Dobson

*Dendrobium kingianum* 'White Ice' L & B Dobson

*Dockrillia calamiformis* L & B Dobson

These have been a surprise packet for me this year with the highland forms flowering one after the other then 'enmasse', followed a couple of weeks later by the thick leaved lowland forms. However, they all have been nothing other than beautiful, and I feel privileged to be flowering and seeing them in my bushhouse.

## The Climbing Orchid - *Erythrorchis cassythoides*

We were delighted to again find this unusual orchid flowering in our local bushland. Although David L. Jones describes it as widespread and common in NSW and Queensland, it is exciting to see such a spectacular flowering so close to home.

The original climbing orchid spotted by Ciaran in 2018 has gone, but there are numerous others in the same vicinity. Several are scrambling on the ground over bushes, rocks and plants and we found one we had not noticed previously growing up an old dead tree nearby. This orchid is flowering profusely all the way up the trunk and is quite impressive.

The other established plant is still clinging to the old grey gum and is flowering but not so abundantly. This plant has produced numerous seed capsules and it would seem that some of the current plants may have originated from this orchid.

The greenish/yellow flowers which are 'pleasingly fragrant' are pollinated by native bees and the bare dark brown/black stems give the orchid one of its common names of Bootlace Orchid.

This is a plant which you may admire and photograph, but not one you can grow at home. It is a leafless, saprophytic terrestrial orchid which gains its nutrients from the interaction of mycorrhizal fungi in dead or rotting vegetation. This would probably explain its current habitat where there are numerous dead branches, bushes and trees.

A wonderful flowering of this species and thrilling to find it again!

(See previous article in ANOS Warringah bulletin.....November 2018)

## Photos from 'the wild'

Barrington foothills.

*Dendrobium speciosum* var. *hillii* had fallen out of a huge casuarina into a creek and I provided some reprieve by dragging it up the bank - for the wallabies?

There were another 5 clumps like this in the tree in full flower but hard to photograph.

*Sarcochilus falcatus*, also at Barrington foothills, near Dungog. *Dendrobium gracicaule* on a conglomerate boulder that also had kingianum on it, and at clontarf *Dockrillia linguiformis* on a massive fig

Best wishes, George Hardy
